

# Power generator units

Complementary solution ensuring continuous power supply to RTC equipment is power generator unit, which automatically provides energy supply in the event of failure in power supply from the grid and back-up source.

## EXECUTION

We offer power generator units in voltages 3x 400 / 230 V AC and power 15, 20, 30, 40 kVA as well as power generator units using diesel oil and gasoline; at request we provide units suitable for mating with UPS.

We deliver power generator units with motors by leading manufacturers, ensuring their long lifecycle and reliable operation:

- IVECO
- PERKINS
- MITSUBISHI
- LOMBARDINI
- HONDA

Power generator units are suited to customer needs and requirements. Liquid cooled or air cooled, in following executions:

- fixed indoor type,
- fixed outdoor type,
- mobile units,
- container installed units.

**We provide comprehensive on-site installations services, including start-up.**
